Course Description
This symposium is designed for healthcare professionals involved in the management of trauma patients. Specialists will provide presentations on current topics and a forum for the exchange of knowledge and ideas on a variety of issues. Panel discussions will also be provided to stimulate dialogue with the audience in a question and answer format. At the completion of this symposium, participants will have enhanced their skills and competence in patient care, medical knowledge, and system-based practice.

Target Audience: Physicians, Emergency Care Specialists, Neurosurgeons, Pediatric Surgeons, Orthopedic Surgeons, Critical Care Specialists, Anesthesiologists, EMS, Social Workers, Psychiatrists, Physical Therapists, Occupational Therapists, Speech Therapists, Registered Nurses, ARNP, PA, Pharmacist and other healthcare professionals

OBJECTIVES: At the completion of this symposium the participants should be able to:

- Evaluate the imaging and management of complex chest trauma
- Understand new endovascular techniques for hemorrhage control
- Explain surgery techniques in a rural environment
- Analyze the advances in critical care in septic patients
- Evaluate the challenges in trauma surgery as a career
- Illustrate the evolution in the non-operative management of penetrating trauma
- Identify the relevance of the trauma registry in a trauma center
- Assess ethical issues in trauma and critical care
